Thanks Chip. The LWG Management team will discuss this with Hans to ensure we have the requested backup for the invoice. It is my understanding that there was confusion regarding the analysis that Techlaw ran, and that the analytical data provided to LWG did not match what was on the invoice. Considering it was over \$100K in work we felt it was critical to get the accurate accounting. Again, Hans will provide us specifics and we'll move forward from here.

Jim.

Jim

This is to follow-up on our conversation a couple of weeks ago regarding withheld amounts from EPA's most recent oversight bill. It is my understanding that LWG withheld \$117,293.96 associated with Techlaw Inc. for analysis of split samples at the EPA Lab in Manchester, WA. It was my understanding that the data had been provided to the LWG, but in a previous conversation I had with Hans Feige it was unclear whether that the LWG had received the data. I am not sure what other concerns the LWG has based on the documentation that has been provided by our finance office, but am forwarding the data from our lab.

Also, this a heads up that our finance office will be sending the LWG an overdue bill notice with demand for payment of the withheld amount plus interest. Please give me call if you have any questions.

Chip
